- ABSTRACT**
- PRESENTATION**
- PAPER**

Günther Mayr is a head of Josef Ressel Center for Thermography and chief technical officer and Co-Founder of the Voidsy, a company from Wels, Austria.

Dr. Gregor THUMMERER

Voidsy GmbH, Wels, Austria

Dipl.-Ing. Gernot MAYR

Voidsy GmbH, Wels, Austria

FH-Prof. Dipl.-Ing. (FH) Dr. Gerald ZAUNER

University of Applied Sciences Upper Austria, Wels, Austria

Dr. Holger PLASSER

Voidsy GmbH, Wels, Austria

SMART AND MOBILE THERMAL TOMOGRAPHY SYSTEM FOR NON-DESTRUCTIVE EVALUATION OF COMPOSITE COMPONENTS

Materials testing often lags the success of new materials and processes. The composites industry needs flexible and mobile systems for non-destructive testing (NDT) that are also suitable for industrial series production. The voidsy 3D V-ROX system offers a very fast and easy-to-automate solu-

tion, which can be used primarily for composites in large quantities with short cycle times as well as for in-service applications. By reducing testing costs, production can be significantly more economical.
